SUMMARY

CS undergraduate building backend systems and cross-platform apps. Built *Qlue*, an AI interview platform with real-time voice interaction using AWS Polly and Firebase, which won 2nd Prize at Google Hack Sprint. Designed event-driven microservices with Kafka and RabbitMQ, and contributed to a production e-commerce app during an internship. Consistently ranked in the top 5 in university-level competitive programming contests.

TECHNICAL SKILLS

Languages: Java, C++, Dart, SQL, JavaScript
Frameworks: Spring Boot, Node.js, Express.js, Flutter
Databases: MySQL, MongoDB
Tools: Git, Docker, Kafka, RabbitMQ, REST APIs, Jenkins, VS Code
Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Qlue — AI-Driven Interviewer [G](#)itHub Mar 2026
Flutter · Dart · Firebase · AWS Polly · Speech-to-Text

- Built an AI interview simulator that generates resume-tailored questions with real-time voice interaction, achieving **<1.5s response latency** using Amazon Polly and Flutter speech-to-text APIs.
- Architected a Firebase backend handling authentication and Firestore sync for **50+ test users**, supporting concurrent sessions without data loss.
- Crafted a modular Flutter UI with **10+ reusable components** across **6+ screens**, delivering consistent UX on Android and iOS.
- Awarded **2nd Prize** among **150+ competing teams** at Google Hack Sprint for demonstrating production-grade AI integration and scalable system design.

Event-Driven User Activity Tracking System [G](#)itHub Feb 2026
Spring Boot · RabbitMQ · MySQL · Docker · Java

- Architected a **decoupled 2-service event-driven system** using RabbitMQ as a message queue with RESTful APIs for asynchronous communication between Producer and Consumer services.
- Implemented **Spring AMQP retry** with exponential backoff (**max-attempts=3, multiplier=2.0**) on the Consumer, ensuring zero message loss during transient MySQL failures.
- Engineered input validation via **@Valid** and a **GlobalExceptionHandler**, returning structured **400 Bad Request** responses with per-field error details.

EXPERIENCE

Full Stack Development Intern | Technical Hub, Surampalem May 2025 – Jun 2025
– Delivered *Flutter Mart* e-commerce app within a **5-member Agile team** across **2 sprint cycles**, shipping **5+ core modules** — product listing, cart, and checkout — on schedule.
– Contributed **3+ frontend feature screens** and backend API integrations, bridging the UI and data layers to support a scalable, production-grade application architecture.

EDUCATION

2023 – 2027 B.Tech, Computer Science & Engineering CGPA: 9.41
Aditya College of Engineering and Technology, Surampalem

CERTIFICATIONS

MongoDB Associate Developer — MongoDB
Oracle Certified Foundations — Java (2025)
Python Essentials 1 — Cisco Networking Academy
Git & GitHub Foundations — Microsoft
Oracle Certified Foundations — Database (2025)
Programming Essentials in C — Cisco
Demonstrated skills: MongoDB (CRUD, indexing, schema design, backend integration) · Git & GitHub (version control, PRs, team collaboration) · Docker (containerisation fundamentals)

ACHIEVEMENTS

- Secured **Top 3** out of **700+ participants** in the **Java-Quest Coding Challenge** conducted by Aditya University.
- Ranked **Top 5** among **500+ participants** in the **SQL Querython** database and query contest, Aditya University.
- Won **2nd Prize** among **150+ teams** at the **Google Hack Sprint** (Aditya University) for engineering the AI interview platform *Qlue*.
